Apprenticeship as an insulation worker or industrial insulator (m/f/d) – Klipphausen

It is common knowledge that walls are insulated to store heat in the house or to protect the building from the cold. But pipes and ventilation ducts also need to be professionally insulated – especially in industry.

During your **three-year training as an industrial insulator (m/f/d)**, you will specialize in the technical insulation of industrial plants and learn how to work with different insulating materials.

The apprenticeship is divided into two stages:

First, you will complete the **two-year apprenticeship as an insulation technician (m/f/d)**. If you perform well and do not want the skilled worker qualification to be the end of your learning curve, you can move on to the third year of training after an intermediate examination and obtain a **qualification as an industrial insulator (m/f/d)**.

Your tasks in practical training:

- We provide you with in-depth knowledge about the selection of suitable materials and the processing of sheet metal.
- You will learn how to read technical drawings and put them into practice.
- You will support your colleagues in the production of sheathing and the installation of various insulation materials.
- We will show you how construction sites are organized and how practical assignments are carried out in the company.
- In addition, you will attend vocational school in blocks, where you will acquire the theoretical specialist knowledge.

In addition, you will attend vocational school in blocks, where you will acquire the theoretical specialist knowledge.

What you bring with you:

- You have a good secondary school leaving certificate
- We require manual skills and an interest in technology
- You are physically resilient and enjoy practical work

Fancy a change?

Are you looking for an exciting professional challenge, but our current vacancies don't quite meet your expectations? Then show us what makes you unique and send us an unsolicited application! We look forward to receiving your detailed application including salary expectations and earliest possible starting date by e-mail to:
